

Environmental Policy

We understand the importance of minimising the effects of our business on the environment and we will achieve this through our commitment to:

- Maintaining our Environmental Management System (EMS), to assess, monitor and control our environmental aspects in order to control the environmental impacts and prevent pollution
- Complying with all relevant environmental legislation and codes of practice
- Maintaining the framework for setting up objectives and targets to improve environmental performance through continuous improvement
- Ensuring that all our employees have the appropriate level of environmental training and awareness
- Operating contingency procedures to prevent and limit environmental incidents
- Reducing where practicable our emissions to air, land and water
- Monitoring our waster disposal and where practicable re-using and re-cycling to reduce waste
- Minimising energy consumption by effective energy saving techniques
- Ensuring the safe storage, handling and use of hazardous substances
- Reviewing our consumption of raw materials and natural resources in order to reduce where possible
- Considering environmental criteria in the procurement of goods and services
- Assisting our Clients in improving their environmental and energy management
